

## **Bone Marrow Donation for Research**

The UC Davis Alpha Stem Cell Clinic is collecting bone marrow cells to determine how they might be used in the future to help eliminate vascular diseases, neurologic diseases, cardiac disease, and improved wound repair. They also want to save these cells to possibly use in therapies at a later date.

### **Who Can Donate?**

Healthy volunteers from 18 to 50 years of age without chronic medical problems, lidocaine allergies, bleeding problems, or a history of tobacco use within the last 3 years.

You will be compensated \$500 total for your time and effort:

- \$100 for the first visit where you will sign a consent, fill out a questionnaire, and have your blood drawn for infectious disease testing
- \$400 for a second visit when the bone marrow will be collected at either the UC Davis Cancer Center or the UC Davis Alpha Stem Cell Clinic

If interested, please call **916-703-9300** for more information.
